Important notes:

- All students need to complete 1 procedure to be called “PPE” use on their first “in person” clinical day – see info sheet “Documenting PPE donning and doffing on clinical return”
- All mandatory “learner selected” observations have been removed.
- Students are encouraged to use the “Learner Selected”* observations wherever they are able, to ensure they are getting regular feedback for their own learning. (*The roll out of this feature may be delayed)
